

CuriosityStream[®]

Factual Entertainment for the Planet[™]

About CuriosityStream

Launched by Discovery Communications founder and media visionary John Hendricks, CuriosityStream is the award-winning documentary streaming and on-demand service where viewers of all ages can fuel their passions and explore new ones. Our documentary series and features cover every topic from space exploration to adventure to the secret life of pets with stunning visuals and unrivaled storytelling to demystify science, nature, history, technology, society, and lifestyle. With thousands of titles, many in Ultra HD 4K, including exclusive originals, CuriosityStream is available worldwide to watch on TV, desktop, mobile and tablets.

Message From Our Founder

The dramatic revolution occurring in television viewing is as undeniable and unstoppable as the rapid worldwide adoption of small, portable cell phones that have now become our constantly connected "smart" companion. On demand streaming television represents the third revolution of television and, in many ways, it is the culminating step of the consumer's relentless desire to control viewing options.

It is a bit challenging to look over the next 10-20 years and speculate about the global market size for distribution of internet-delivered television streaming, but it is worth the effort. One can now start to see the tailwinds that are accelerating the already rapid growth of streaming television.

The plummeting cost of video streaming combined with sponsorship subsidies means that the subscription cost of SVOD television can be

reduced to unforeseen affordable levels... "Priced for the Planet". For close to the price we all used to pay for a single show on a DVD, we can now enjoy thousands of premium titles from an SVOD service on demand and all year long.

*...the
"Platinum Age
of Television"
is here.*

We have at last arrived at a new superior level of consumer experience with television...the "Platinum Age of Television" is here. The high expectations of consumers in this new age is certainly in mind as we program **CuriosityStream**. This new era is all about delivering the pinnacle of scripted and factual content that can be enjoyed by global consumers at any time and on every digital viewing platform.
